Q. The synopsis indicates that the storage vessels need to be lifted, transported, and erected. Would you kindly elaborate on what it means by being erected?

A. The site will be adequately prepared to support the movement and lifting activity.

Q. The duration of this project is nine months. It appears that we could receive a delivery order on the last day of this nine month period which would affect the duration of our work. What would be the maximum performance period for any given delivery order?
